

BUILD YOUR OWN WASTE CONSCIOUS CALENDAR

Thanks for downloading our exclusive print-your-own calendar! Follow the steps below and get ready to grow your waste knowledge as we journey through a time of waste!

- Print the following page/s at a 100% scale.
- Fold the page in half (use the centre "T's" and dotted lines to guide you).
- Glue the pages as indicated to the one small fold as indicated and push down.
- You will now have your own tent calendar!
- Remember after each month to recycle it once done!

Fold the page in half, then fold along the dotted lines.

Every fold should be backwards, so the artwork stays visible at all times.

Once folded, take some glue and coat this side, placing the other short fold on top.

1 JAN New Year's Day

IT'S ABOUT TIME!
THE AGE OF NEGLECT

In the past, waste was often discarded without thought, creating challenges we still face today. However, these careless habits taught us valuable lessons about the need for **awareness, education, and responsible waste management**. By learning from our past, we can build a better future!

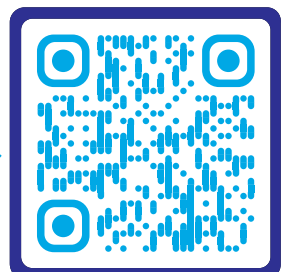

Proudly brought you by the Interwaste Group of Companies. Stay up to date with us by visiting blog.interwaste.co.za or scan the QR code.

MORE THAN MEETS THE "I"

THE COST OF POOR WASTE MANAGEMENT

MORE THAN MEETS THE "I"

As waste piled up, the impact became impossible to overlook. Polluted air, contaminated water, and unhealthy soil led to concerning environmental, social and economic impacts. This was a wake-up call, revealing the true cost of neglect. **It's about us - about finding a solution collectively to manage our waste in a better way.**

21 MAR Human Rights Day

WHAT GOES AROUND, COMES AROUND

Weak waste practices are key drivers of this ongoing struggle, setting off a chain reaction! They contribute to environmental degradation, biodiversity loss, health issues, social challenges, and economic headaches. Recognising these connections is essential for implementing more effective waste management strategies.

SERVING LAND AND LIFE

SMALL STEPS, BIG IMPACT

The waste management industry has evolved significantly in response to past challenges. Today, in South Africa, **we see progress alongside ongoing hurdles.** While we've made strides in improving practices, systemic issues and new challenges still pop up, reminding us there's more work to do.

Our waste management solutions are built on compliance, efficiency and safety. We offer a range of solutions aligned to the hierarchy of waste principles from re-use, re-purposing and recycling waste right through to the carefully monitored and controlled disposal of waste in engineered landfills. Our focus is on assisting clients' transition to circular economy models to ensure a more sustainable future for all life on earth.

AUGUST

UNCHARTED WATERS

We are constantly pushing the boundaries of innovation, moving beyond the traditional. Our Effluent Treatment Plant (ETP) is revolutionising liquid waste management. Processing 43 million litres of industrial effluent annually, it recovers up to 90% as clean, reusable water—exceeding regulatory discharge limits. **With 36 million litres of clean water produced each year, the ETP sets a new standard for circularity in waste management.**
